

Our Projects

Commercial

The primary objective of this project is to transition from traditional fluorescent/incandescent lamps to LEDs, aiming to conserve energy and adhere to Green Building Standards.

The project commenced in September and encompasses 21 sites across Dubai, Abu Dhabi, and the Northeast Emirates, encompassing both indoor and outdoor lighting installations.

Client - Sharjah Municipality

The Sharjah Municipality, renowned as the largest in the Middle East, embarked on a substantial initiative to convert all fittings to LED technology.

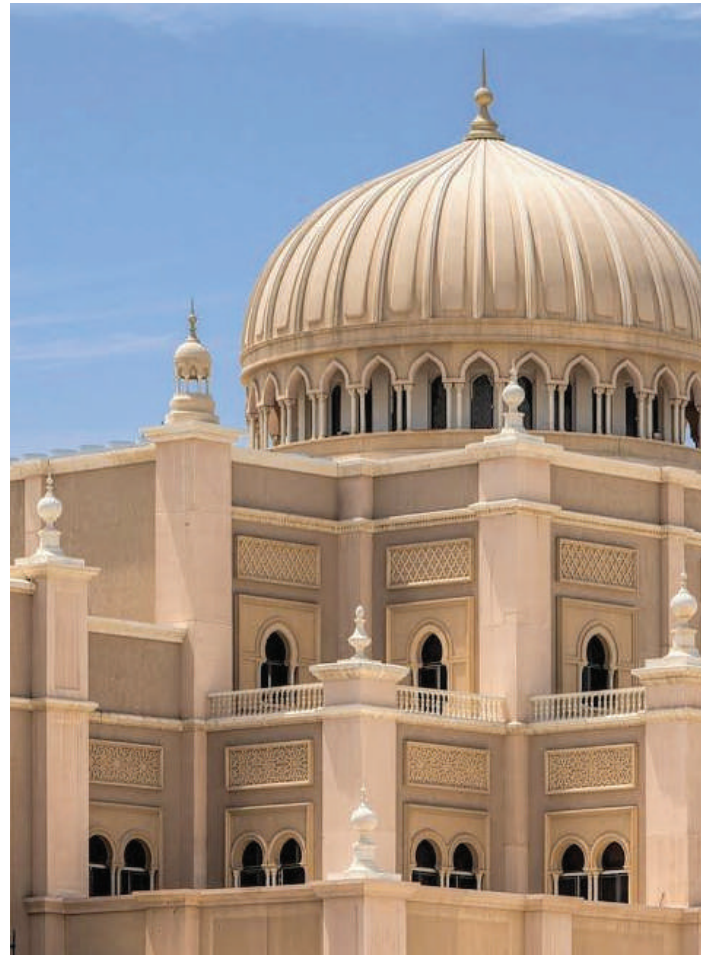

Ensuring the preservation or enhancement of light levels over sidewalks, the municipality employed photometric measurements to evaluate brightness and distribution.

This project, concentrated on outdoor lighting, began in Sharjah.

Retail

Client - Gift Market

The opening of the largest Gift Market store in the UAE presented a challenge to lighting professionals. The main goal of the project was to light this vast space with a limited number of types of luminaires.

These include a combination of spotlight and linear track.

The Flex T-Line Track Linear: Seamless, energy-efficient lighting with easy installation, combining spotlights and linear tracks for versatile design.

Client - RMA Motors

A car showroom is a place of special character. With such large areas, lighting is very important. It must cover the entire surface and bring out the real colour.

High Bay industrial lamps are suitable for high rooms, the possibility of hanging them on cables allows you to adjust the lamp to the height of the room.

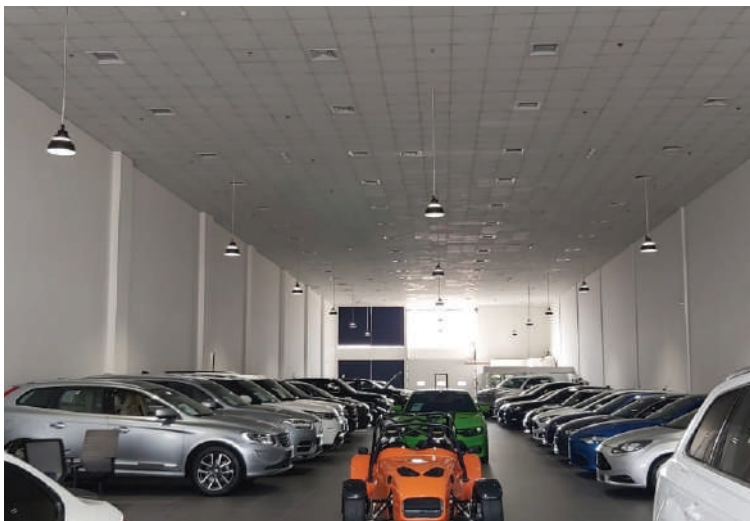

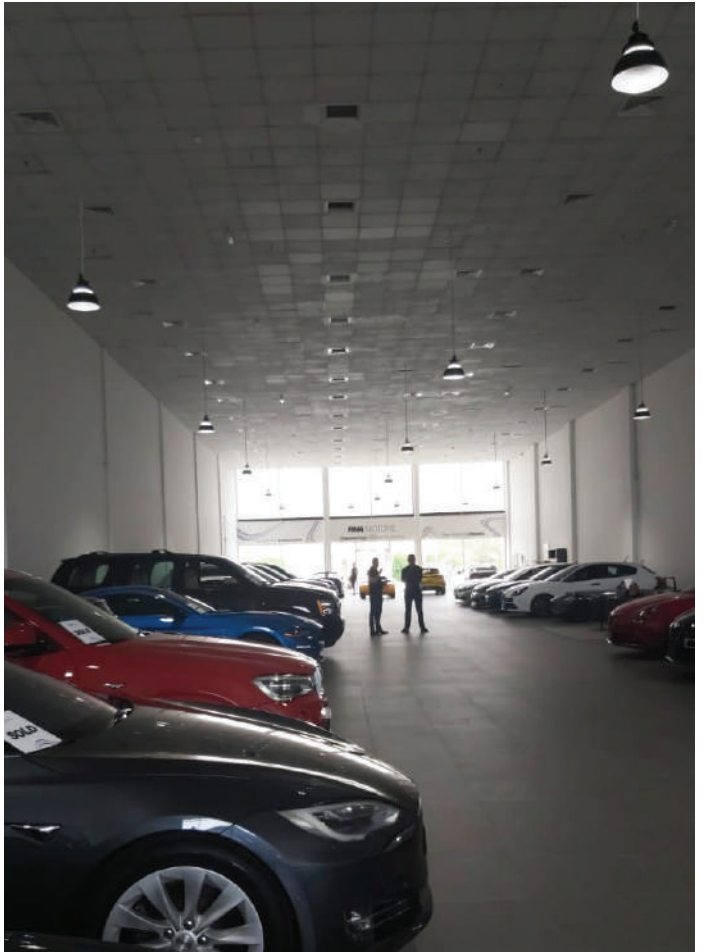

During this project, Burten High bay luminaires were used in the lighting design. Thanks to the use of high quality materials and attention to finishes, the fixtures are not only very durable, but also aesthetically pleasing.
